Warranty

To ensure your legal right, please read and fill this warranty card carefully.

Subject to the terms and limitations below, Command Auto Group PTY LTD (Command) will for 24 months from date of purchase, repair, or replace your COMMAND GO THROTTLE CONTROLLER, if, in Command's opinion, it need repair because of a manufacturing or materials defect.

This Command manufacturer's warranty is not transferable and applied to the original purchaser only. No person has authority to vary the terms of this warranty.

Limitations:
This Command manufacturer's warranty does not cover:
• Maintenance, repair or replacements of consumables due to normal wear and tear.
• Repair of scratches to the outside of the unit and other externally exposed parts caused by normal use of the unit.

This Command manufacturer's warranty does not cover repairs necessitated by:
• Attempts to repair the unit by someone else other than Command.
• Failure to adhere to installation or operating instructions, or connection to incompatible equipment.
• Failure to perform maintenance and cleaning.
• The use of non-Command parts, not specified for use with this product.
• Accident, neglect, improper storage or act of God.
• Repair of any accessories not supplied by Command.

Other rights–Products purchased in Australia only
The benefits given by this Command of manufacturer's warranty are additional to other rights and remedies that you may have under law. Our goods come with guarantees that cannot be excluded under the Australian consumer law. You are entitled to have the good repaired or replaced, or a refund for a major failure and for compensation for any other reasonably foreseeable loss or damage.

How to claim
To obtain service under this Command manufacturer's warranty, Proof and date of purchase is required. Warranty service will only be provided upon supply of the original purchase receipts showing your date of purchase. Repairs will be conducted at Command or at our option, an approved Command professional fitters premises. Transport costs to and from the service centre are not covered by this warranty and are the responsibility of the customer.

In order to make a claim under this manufacturer's warranty, you must contact command during the warranty period.

When contacting Command for assistance, please provide your name and address, model number, serial number, date of purchase, and a complete description of the problem. This will help Command provide fast assistance

COMMAND GO™
Throttle Controller

Instruction Manual

4 MODES x 9 SENSITIVITIES for Manual and Auto

Thank you for purchasing Command GO, the latest in intelligent throttle control.

For best performance, please read the following instructions carefully before installation and use.

⚠ This unit increases or decreases throttle acceleration, changing the performance of the car. It is essential all drivers are aware of settings and effects prior to operating vehicle at any time.

⚠ It is recommended to test the vehicle in a quiet, safe area after fitting.

⚠ Caution

It is NOT recommended to use this unit on wet or greasy roads and conditions. Always use <u>BYPASS MODE</u> in Wet weather conditions.

⚠ Caution

Before driving the fitted vehicle, ensure <u>ALL OPERATORS</u> are fully aware of the functions and operations concerning the Command GO unit.
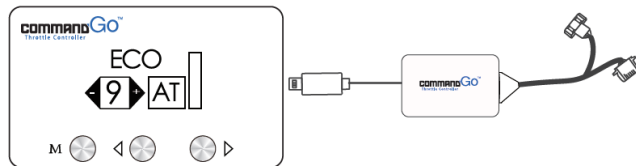

Controller   Module

Product Features

1. Command GO controls the sensitivity of the throttle to better adapt to your driving habits, and road conditions.

2. Command GO includes six modes: INTELLIGENT, ECO, BYPASS, BOOST, SPORT, ELITE, and ANTI-THEFT.

3. Command GO can be fitted to both AUTOMATIC and MANUAL transmission vehicles.

4. Command GO is designed to provide a smooth effect curve to ensure acceleration of the throttle.

⚠ Caution: Command GO manufacture default is preset to SPORT mode- Sensitivity 6

Function- Pedal Learn Function (if required)

Command GO system has been pre-programmed with the corresponding model at the time of delivery. However, there may be occasions where individual vehicle parameters have changed. The Command GO is uniquely designed with a "Learning Function."
If any issues arise within the standard installation, such as high idling speeds or poor acceleration, please follow the steps below.

1. Turn key to ignition, but DO NOT start the car.
2. Press and hold the ◁ and ▷ button for five (5) seconds. The controller screen will show a 15-second countdown.
3. During the countdown period, press in the accelerator pedal all the way. Hold for one (1) second.
4. Release the pedal and wait for the controller screen to show the response.
   If "SUCCEED" is displayed, the Learn Function has been successful.
   If "FAILED" is displayed, the Learn Function was unsuccessful.
      - Repeat steps 1-3 until "SUCCEED" is displayed.

For further assistance, contact Command Customer Service

One-Touch Overtaking Function:
While driving, if the mode has not been changed since commencing, press the M button to jump directly to Elite Mode to facilitate overtaking.

Anti-Theft Function (ATF)
The "ATF" will lock the throttle inhibiting the car from acceleration.

Set up ATF password:
1.   Press and hold M and < buttons for three (3) seconds.
2.   The screen will display 000.
3.   Use the M, < and > keys to set a 3-digit password.
* Please keep the password in a safe place and commit it to memory. Without the password it is impossible to exit anti-theft mode.

Activate ATF mode:
1.   Press and hold M and < for three (3) seconds.
2.   The screen will display ATF.

Exit ATF mode:
1.   Press and hold M and < for three (3) seconds
2.   Enter your three (3) digit password
3.   Press and hold M and < for three (3) seconds.
4.   The screen will return to previous operational mode

Safety – Please Read Carefully

Before installing Command GO, please familiarise yourself with the accelerator, plugs and Command GO module and harness.
After installation, start the engine and under Park or Neutral, check that the accelerator is working at normal condition.

If installed incorrectly, it will send an invalid accelerator signal which will set off the engine warning light. The Command GO is designed with an internal protection circuit to prevent harm to the car's electrics.

If a fault mode appears on vehicle, turn off the ignition, disassemble the Command Go and wait five (5) minutes for the protection circuit to reset to normal state.

Then reinstall following the installation instructions.
If the check engine light appears again, contact the seller or CAG Customer Service team at 02 8853 2900.
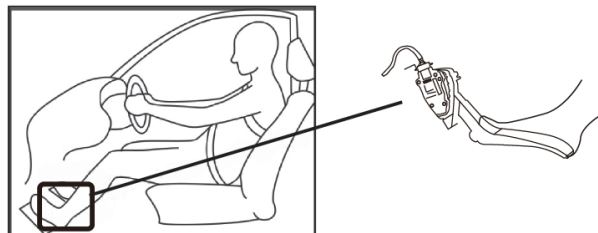

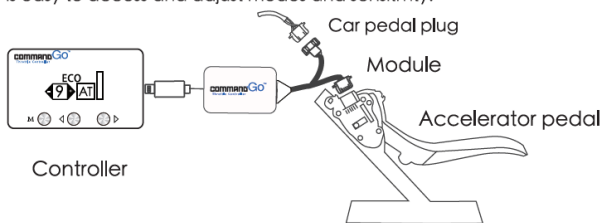

⚠ Note: Before Driving, operator should have complete understanding of operating cautions. Advise any and ALL drivers of the full operation of this unit.
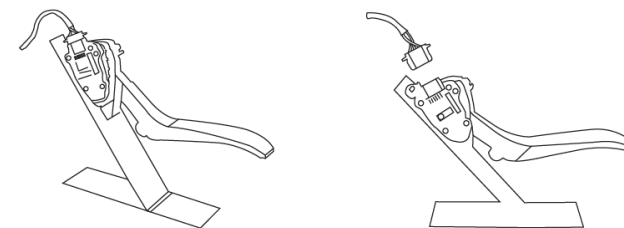

Product Installation

The Command GO module and harness is connected between the accelerator pedal and the car pedal plug.

There is a power cord that connects the module to the controller screen.

The controller screen should be mounted on the console in a place that is easy to access and adjust modes and sensitivity.

Car pedal plug
Module
Accelerator pedal
Controller

Make sure the cars power is turned off before starting installation.

1. Disconnect the plug attached into the accelerator pedal (make careful note of the direction the plug for re-installation).

⚠ The installation connection for each vehicle throttle may vary in appearance.

2. Connect the Command GO throttle controller between the disconnected plug and the accelerator pedal. Tuck the module and cords out of the way of the pedals and use the provided cable ties to secure.

⚠ Caution: Ensure there are no loose wires that may hang, trap, or entangle accelerator/ break pedal or feet.

3. Remove the backing on the Controller screen and mount on the console. Please choose a place that is easy to access and adjust the mode and sensitivity while driving.

Operation

1. To select the desired mode, press the M button to cycle through.

2. The modes and sensitivity can be adjusted at any time while the power is on.

⚠ ENSURE AT ALL TIMES- Pay attention and drive safely
