G8.8 Bolt Torque						
DIAMETER (mm)	5mm	6mm	8mm	10mm	12mm	14mm
LUBRICATED (Nm)	5 Nm	8 Nm	16 Nm	33 Nm	56 Nm	84 Nm
NON-LUBRICATED (Nm)	6 Nm	10 Nm	22 Nm	44 Nm	77 Nm	112 Nm

Let's get to work.

Preparation

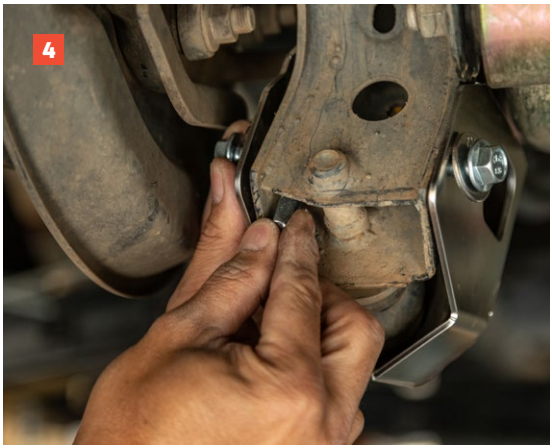
1. We want a nice clean starting surface, so remove any dirt and debris from the mounting surfaces on the shock absorber mount.
2. Depending on your setup, it might be easier to install the Shock Guards with the rear wheels off to allow clear access to the mounting points.

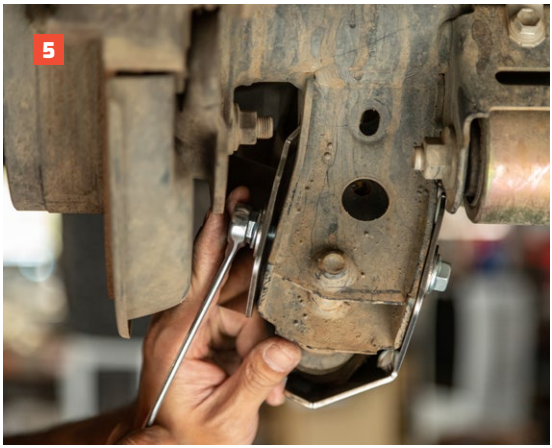
Installation

1. Position the guard over the shock absorber, ensuring the top tab is seated in the hole as shown.
2. Check clearances around the guard.

Installation cont.

3. Using the M10 bolts, washers and nuts, loosely install the bottom inwards mount.
4. Repeat for the outer mount, with the M10 bolt and washers as shown.
5. Adjust the positioning of the guard if needed. Before fully tightening the guard, pull the guard forward and down to ensure maximum clearance to the handbrake line. Torque all bolts to required torque as per table.
6. Repeat for the other side, and that's all there is to it!





Local Knowledge & Assistance

We know half the fun of building your dream 4x4 is getting your hands dirty. But we also know that sometimes, things don't go to plan. If in the pursuit to build the ultimate setup you find yourself off-track, we're here to help you get unstuck.
