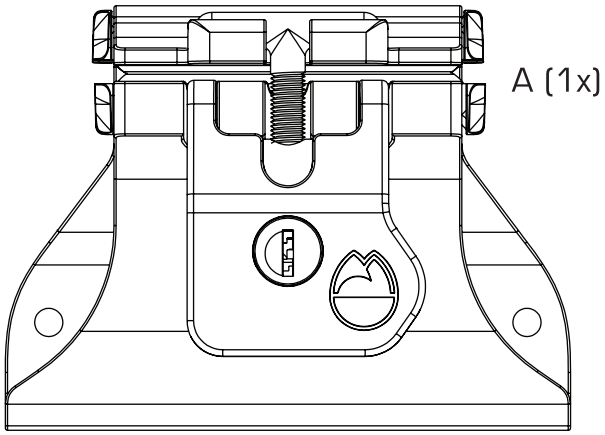
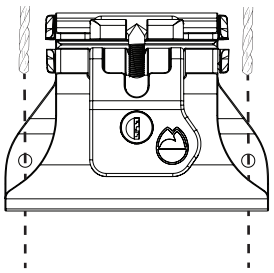
Parts Included

A: DropTop Body
B: T30 Torx Key
C: M6 x 30 SHCS Torx Bolt
D: M6 Flat Washer
E: Track Plate
F:Lock Core
G: Key



1 Install Body

For Hard Mounting
Using body as a template, mark locations and drill holes on mounting surface (Holes for M6 or 1/4" hardware and are spaced at 110mm for both mounting orientations). Install mount onto surface using appropriate fasteners.



For Track Mounting
Loosely install the included M6 x 30 Torx Bolt (utilizing either the vertical or horizontal mounting holes depending on orientation of mount) with a Flat Washer and a Track Plate onto the mount. Slide the mount along with the track hardware into desired position and tighten both bolts with the T30 Torx Key.

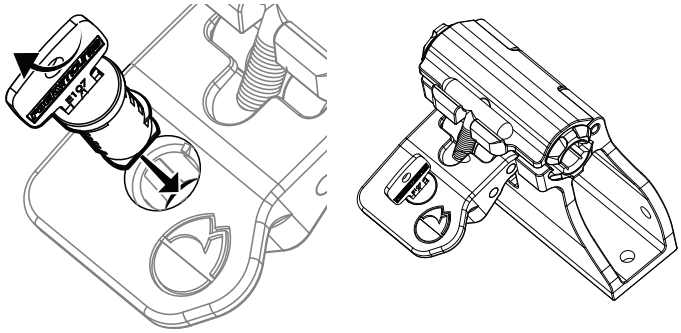
Assembly Instructions Cont.

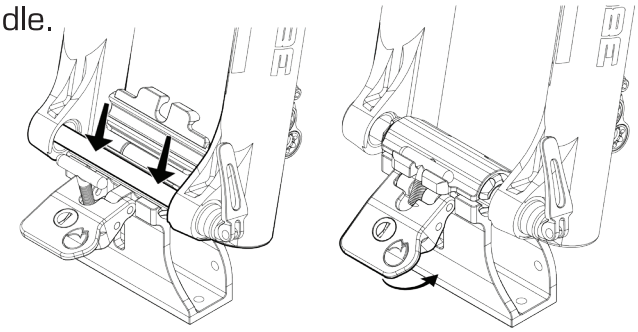
2 Install Lock Core

Insert key into core. Line up the protruding retaining wafer between the indicator tabs on the handle and insert lock core.



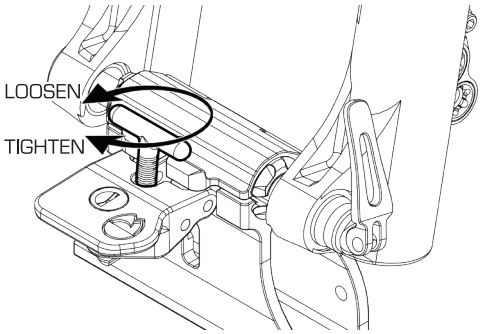
3 Load Bicycle

Remove front wheel and reinstall axle. Open DropTop, load axle into clamp and close the top cap. Rotate T-bolt into place and close handle.



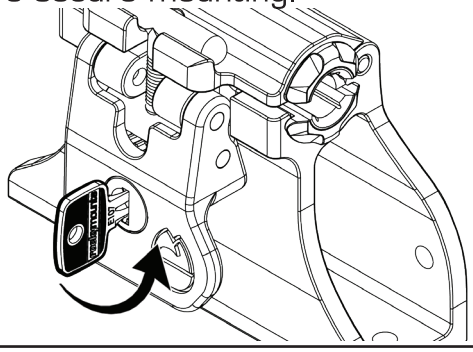
4 Adjusting T-Bolt

Handle should close with some force. If too tight or too loose, open handle and adjust T-bolt until handle closes with desired tension.



5 Secure Bicycle

After bicycle is securely mounted, insert key and turn to lock handle. Shake fork side to side to ensure secure mounting.



Warnings

- Remove baby seats, panniers, U-locks, or items that could detach from the bicycle
- Check all fasteners before each use and periodically lubricate T-bolt
- If mounted externally, remove bicycles before entering car wash
- Once a year, remove from car to clean and inspect for damage or rusting
- RockyMounts™, Inc. cannot be held liable for stolen bicycles
