Assembly Instructions

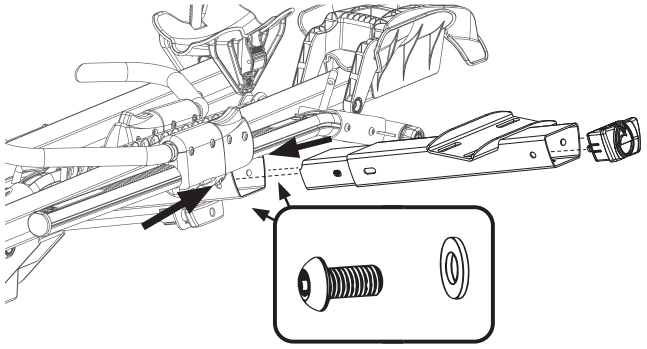

1 Remove End Cap

Depress tabs and pull end cap out of HighNoon Spine

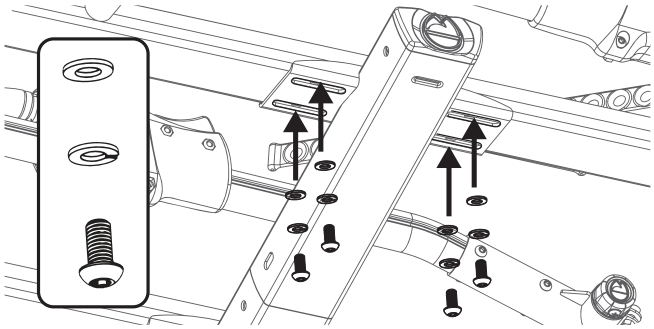

2 Install Add-On Spine

Insert add-on spine into main spine. Install two M8x16 bolts with two flat washers. Reinstall end cap into add-on spine

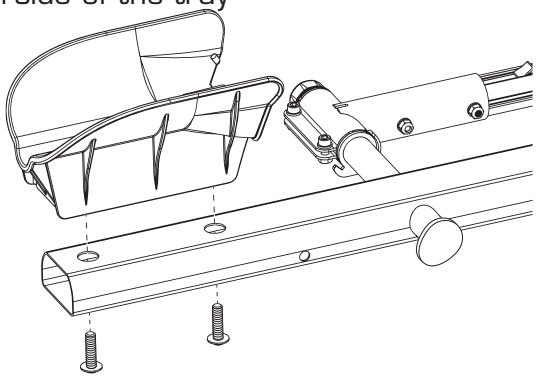

3 Install Wheel Tray

Place wheel tray on the add-on spine with the load arm facing away from vehicle. Install four M8x16 bolts with M8 washers through slots under add-on spine

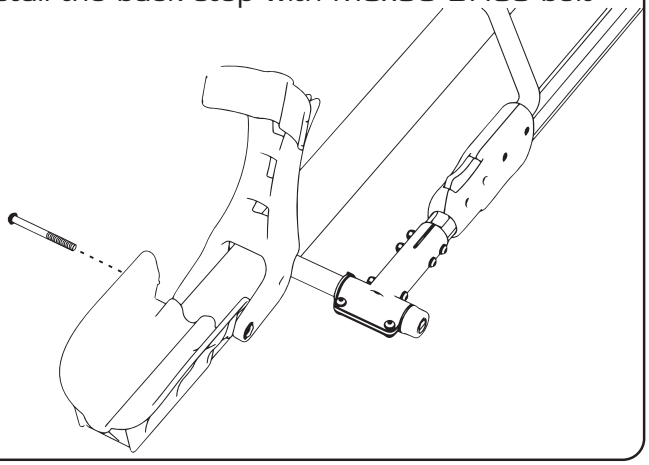

4 Install Front Wheel cup

Push the front wheel cup onto the tray and screw in the two M8x30 flanged screws from the underside of the tray

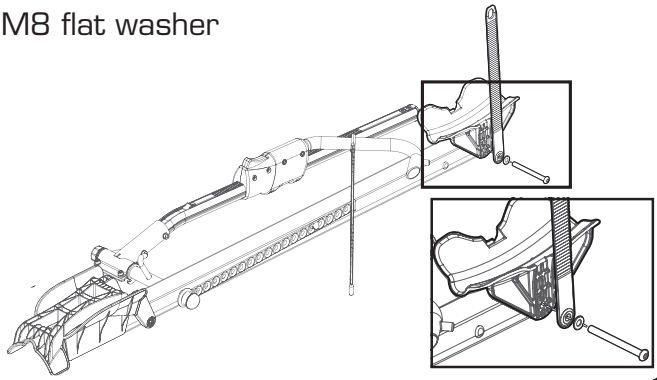

5 Install Wheel Back Stop

Install the back stop with M8x85 BHCS bolt

6 Install Rear Wheel Cup

Align holes on the wheel cup, tray, and wheel strap. Make sure the buckle faces away from vehicle. Install with M8x90 BHCS bolt and one M8 flat washer

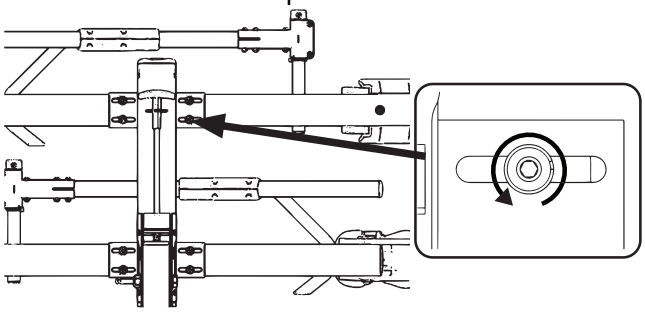

Read all warnings on last page before use.

Rack Adjustability

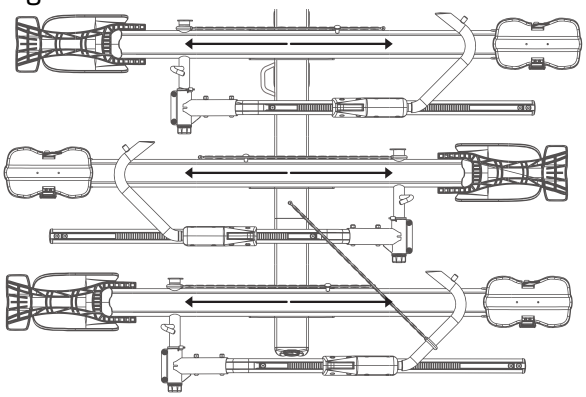

1 Loosen Bolts

Trays can be adjusted side-to-side to avoid handlebar interference. Remove bikes and fold rack to stowed position. Loosen eight M8 bolts on bottom of spine

2 Adjust Trays

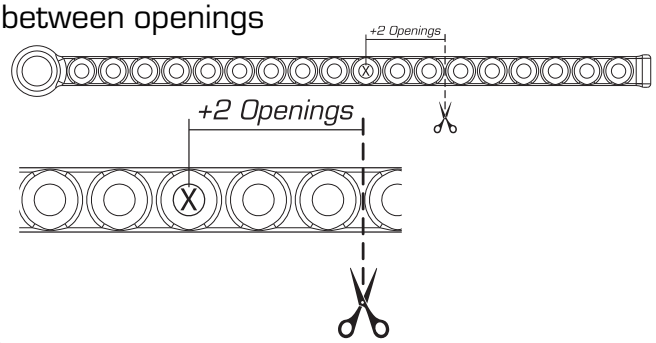

Slide trays as much as needed and re-tighten all eight M8 bolts

Trimming Excess Strap

1 Shorten Strap

Measure and find desired strap length (**X**). We suggest +2 additional loops from your chosen length. Then carefully cut strap between openings
